MEMORANDUM FOR THE RECORD

SUBJECT: File Destruction Work

Art- Have you talked to
 [] on safety aspects
 of dual powered system
 9K
 (All FID Incinerator)

1. During my visit [] on the 28th of December a review of the file destruction work was made. Listed below are the results.

A. Air-Fed Incinerator, Model 1

All of the photographs [] are for the first prototype unit. If photos are to be used in a pamphlet new ones will have to be taken using the spare incinerator at []

B. Air-Fed Incinerator, Model 2

The metal components for the 110V, 50/60 cycle, as well as the base for the 220V, 50/60 cycle were nearly completed. The proper motor-blowers are on order and should be delivered by [] around the first of February. The drawings are nearly completed and should be ready around the same time.

C. Air-Fed Incinerator, Model 3

[] would like the opportunity to fabricate a second unit plus make us a set of working drawings. Right now all they have are photographs and sketches. However, with the budget restrictions it appears as if their prices (approximately \$5000 for drawings and \$4000 for fabrication of a second unit) will be too out of line.

D. Dual Power Unit for Model 1 Incinerator

The dual power unit for the incinerator is now at [] is being evaluated. It appears as if the fan size is wrong on this unit, but that will be determined in test. A photograph of this dual system is shown below.
